

Dear valued customer,

In the interest of technical progress, we conducted changes to our product

"EFM02 Spartan-6LX FPGA module with USB 3.0"

- The USB 3.0 connector which was Type Micro-B is replaced by a full-size Type-B connector to improve mechanical stability and durability.
- The EEprom, connected to the FX-3 is replaced by a larger one (1 MBit) to enable on-board storage of customer specific bootable FX-3 firmware.
- Some minor layout changes are made to improve EMI of the voltage regulators.
- The pinout, the size of the board and the position of the IO connectors are not changed with the exception of the USB 3.0 connector size. The connector size is bigger now, which should allow painless adaption of customer front plates.

Manufacturer Part Numbers	Subject	Replacement*
C028229 EFM02-45-3I	USB 3.0 connector type change, FX-3 EEprom Size change Layout improvements.	C028304 EFM02/B-45-3I
C028240 EFM02-100-3I		contact factory for this item
C028239 EFM02-150-3I		C028303 EFM02/B-150-3I

* The replacement is only a suggestion and the end customer is asked to verify the proper functionality in the application.

For last time buy of the discontinued items please contact factory until 31.12.2015
